ERCOT QUICK FACTS

At a glance

- 85% of Texas load
- 23 million consumers
- Competitive-choice customers: 73% of load
  -- 6.7 million electric-service ID’s (premises)
- 40,530 circuit miles of high-voltage transmission:
  -- 9,249 miles of 345 kV and 19,565 miles of 138 kV
- 550 generating units
- >74,000 megawatts (MW) capacity for peak demand
  -- One megawatt of electricity can power about 200 Texas homes during periods of peak demand.
- Record peak demand: 68,305 MW (Aug. 3, 2011)
- Energy used in 2011: 334 billion kilowatt-hours
  -- A 5% increase compared to 2010
- Market size: About $34 billion
- Market participants: >1,100 active entities that generate, move, buy, sell or use wholesale electricity

What do we do?

The Texas Legislature restructured the Texas electric market in 1999 by unbundling the investor-owned utilities and creating retail customer choice in those areas, and assigned ERCOT four primary responsibilities:

- System reliability – planning and operations
- Open access to transmission
- Retail switching process for customer choice
- Wholesale market settlement for electricity production and delivery

How is the market doing?

Transmission Investment and Development

- $7.4 billion in transmission added since 1999
- 9,500 circuit miles of transmission improvements since 1999
- 6,700 circuit miles of transmission planned
- $8.7 billion under development in five-year plan; ~$5-7 billion to support 18,000 MW of wind

Generation Development

- 46,000 MW new generation added since 1999
  -- 136 older units decommissioned
- 7,500 MW generation committed for the future
  (with transmission contract and air permit)
- 40,000+ MW of active generation requests under review, including 21,000 MW wind (October 2012)

Wind Integration

- Wind capacity: >10,000 MW
  -- Most of any state in the nation
  -- Includes >2,000 MW in coastal area
- Wind generation record: 8,521 MW (Nov. 10, 2012)
  -- 25.9 percent of load at the time

Retail Service Switches to Competitive Retailers

- 59% of residential load (October 2012)
- 65% of small commercial load (October 2012)
- 179 certified competitive retail electric providers

Advanced Meters and Demand Response

- >5.8 million advanced meters
  -- 92 percent of ERCOT load settled with 15-minute interval data
- >1,800 MW in demand response resources, including:
  -- Load resources (mostly large industrial) ~1,200 MW
  -- Emergency response service (commercial and industrial) ~430 MW
  -- Utility load management programs
- Additional economic demand response, voluntary public responses to conservation requests and more

ERCOT GOVERNANCE

ERCOT Board of Directors

Craven Crowell  
Chair  
(unaffiliated)

Judy Walsh  
Vice Chair  
(unaffiliated)

Jorge Bermudez  
(unaffiliated)

Andrew Dalton  
Valero Energy Corporation  
(industrial consumer)

H.B. “Trip” Doggett  
President and  
Chief Executive Officer,  
ERCOT (ex-officio)

Mark Dreyfus  
Austin Energy  
(municipal utility)

Nick Fehrenbach  
City of Dallas  
(commercial consumer)

Michehl Gent  
(unaffiliated)

Sheri Givens  
Office of Public Utility Counsel  
(residential consumer,  
ex-officio)

Kevin Gresham  
E.ON Climate & Renewables  
(independent generator)

Eric Hendrick  
Stream Energy  
(retail electric provider)

Clifton Karnei  
Brazos Electric Cooperative  
(cooperative)

Donna Nelson  
Chair,  
Public Utility Commission  
(ex-officio, non-voting)

Karl Pfirrmann  
(unaffiliated)

Scott Prochazka  
CenterPoint Houston  
(investor-owned utility)

Jean Ryall  
CCNG, Inc.  
(independent power marketer)

Segment Alternates

Shannon Bowling  
Cirro Group  
(retail electric provider)

Jeff Brown  
Shell Energy North America  
(independent power marketer)

Mark Carpenter  
Oncor Electric Delivery  
(investor-owned utility)

Barbara Clemenhagen  
Topaz Power Holdings  
(independent generator)

Mike Packard  
South Texas Electric Cooperative  
(cooperative)

Carolyn Shellman  
CPS Energy  
(municipal)

Board, Stakeholder Process

The ERCOT Board of Directors has general overall responsibility for managing the affairs of ERCOT, including approval of the budget and capital spending priorities, approval of revisions to ERCOT protocols and guides, and endorsement of major new transmission recommendations.

ERCOT’s 16-member “hybrid” board includes five independent (or unaffiliated) members; three consumer segment representatives (industrial, commercial and residential); the ERCOT CEO; the Public Utility Commission (PUC) chairman (non-voting), and six representatives from each of the industry segments – investor-owned utilities (or transmission owners), municipal-owned utilities, cooperatives, generators, power marketers and retail electric providers.

Under the Board’s oversight, ERCOT’s stakeholder process is responsible for developing policies, procedures, and guidelines for power grid coordination, reliability, and market operations. Six standing committees and subcommittees supported by numerous working groups and task forces function within the stakeholder process.

PUC, Legislative Oversight

ERCOT is unique because its electricity grid is not synchronously connected outside of the state. Because of its separateness, ERCOT is primarily regulated by the Public Utility Commission of Texas (PUC) and the Texas Legislature, not federal authorities. The PUC approves the ERCOT system administration fee and has general oversight authority including the ability to order audits.

For most purposes, ERCOT, like the PUC, is accountable to the Texas Legislature and its jurisdictional committees. For federal reliability standards, ERCOT is accountable to the Texas Reliability Entity, the North American Electric Reliability Corporation, and the Federal Energy Regulatory Commission.
