

Summer is here!

Energy use in Texas is highest when it's hot. Help ERCOT keep your family cool this summer.

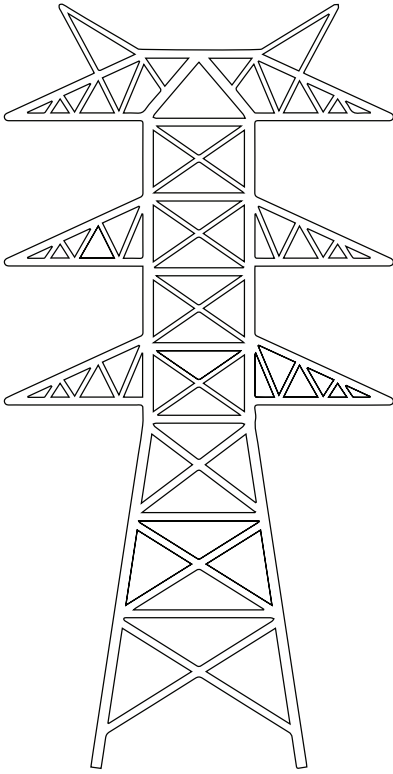

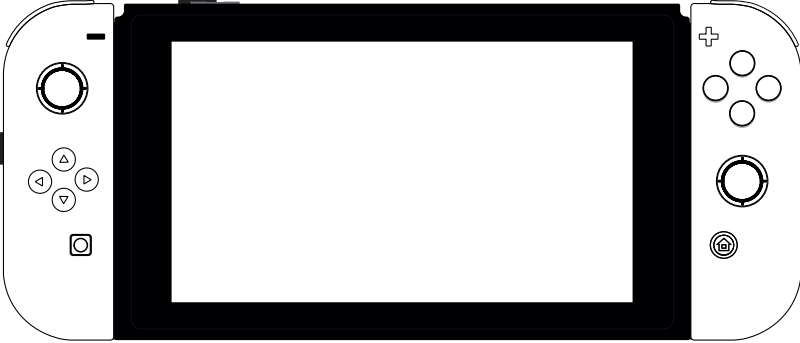

If you have your own pool, ask your parents to set the pool pump to run late at night or early in the morning.

Ask your parents to raise the thermostat by 2 or 3 degrees between 3 and 7 p.m.

Turn off your video game systems, TVs and computers when you're not using them.
