About this page:

- Unlike the rest of the wireframes in this document, this My MIS page shows an **example** rather than a **complete** set of portlets. All other pages show all the portlets currently assigned to that page.
- 1 Portlets on this page can be manipulated in various ways by portlet header buttons.
- 2 The utility navigation link "administration" is only available to Portal Administrators

These wireframes are designed to approximate the actual amount of screen real estate used by various page elements. It is a good indication of how much content can fit within a 770px window.

- About This Page**
- Intent:
 - 1** **Introduce the Section** – the “IN THIS SECTION” portlet shows the sub-pages beneath and example topics available on those pages
 - 2** **Offer “orphaned” portlets** that don’t fit neatly within a section page (e.g. “CRR Auction”)
 - 3** **Offer sub-page portlets** that are broad enough to not give this page a feeling of redundancy (e.g. “Useful Links” portlets)
 - 4** Shows a “narrow” portlet put in a “wide” pane

Pages other than the My MIS page can serve as a means for users to find portlets (and see them in action) for addition to their My MIS page.
