**ERCOT'S ERRATA TO ITS CREZ TRANSMISSION
OPTIMIZATION STUDY COVER PLEADING**

COMES NOW the Electric Reliability Council of Texas, Inc. (ERCOT), and files this Errata to correct the cost estimates in ERCOT's CREZ Transmission Optimization Study (CTO Study) cover pleading, filed yesterday. The following are the correct estimated costs:

- For Scenario 1 – Plan A, the estimated cost of the transmission proposal that best meets these criteria is \$2.95 billion, excluding collection costs
- For Scenario 1 – Plan B, an alternate, more scalable transmission proposal is also included, with an estimated cost of \$3.78 billion, excluding collection costs
- For Scenario 2, the estimated cost of the transmission proposal that best meets these criteria is \$4.93 billion, excluding collection costs
- For Scenario 3, the estimated cost of the transmission proposal that best meets these criteria is \$6.38 billion, excluding collection costs
- For Scenario 4, the estimated cost of the transmission proposal that best meets these criteria is \$5.75 billion, excluding collection costs

The Numbers in the CTO Study itself are correct.

Respectfully submitted,

By:
