Advanced Metering – ERCOT Market Overview

Transmission and Distribution Service Providers

NIDR 867_03 Transaction
Used for retail switch processing.
Contains monthly meter usage
data for settlements

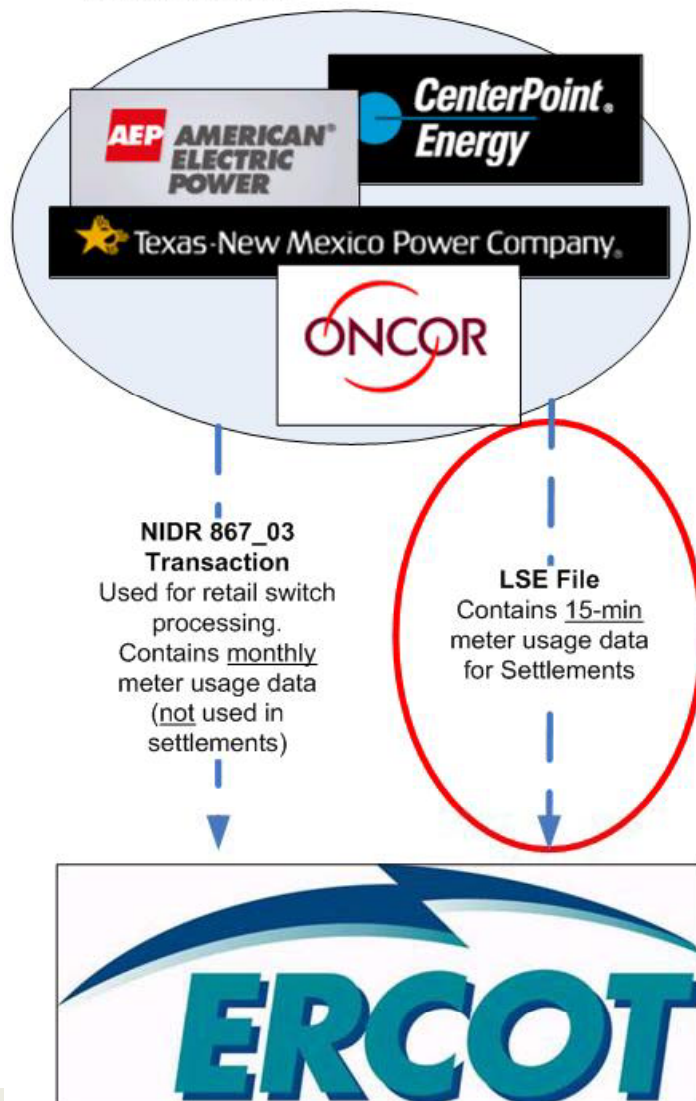

Current Process

- TDSPs currently submit TXSET transaction 867_03 containing monthly summary meter usage data for non-IDR (NIDR) meters.
- The 867_03 transaction is also used to facilitate retail switch processing.

Advanced Metering – ERCOT Market Overview

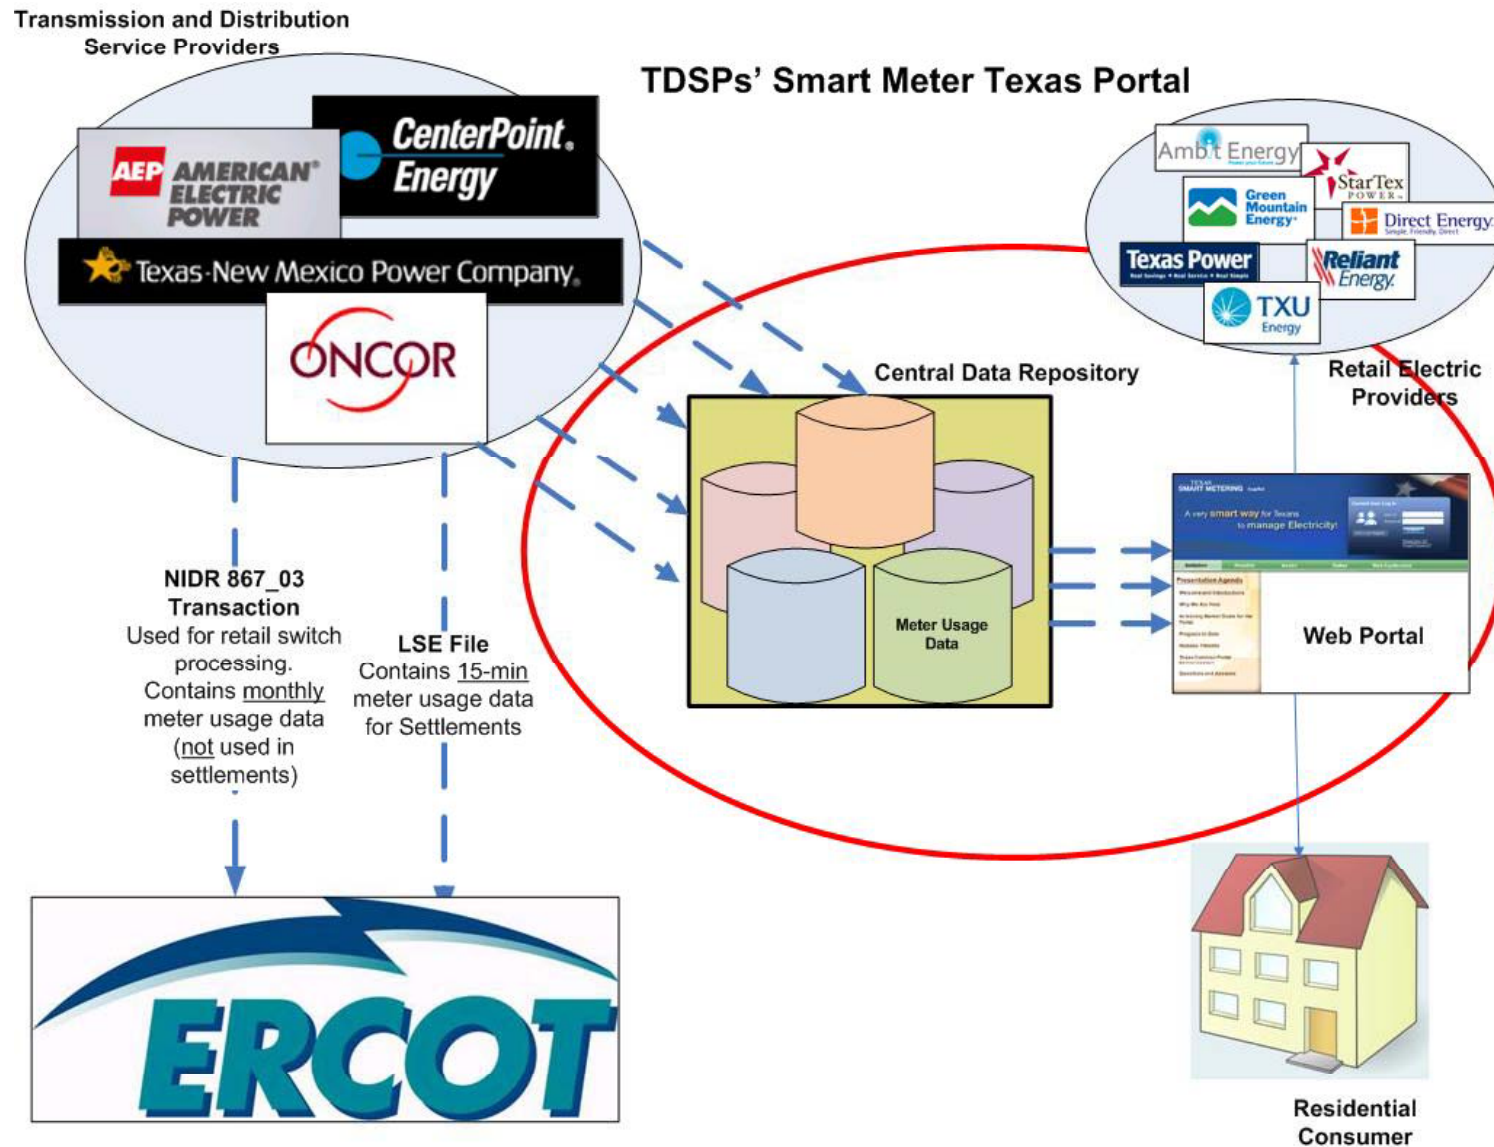

Transmission and Distribution Service Providers

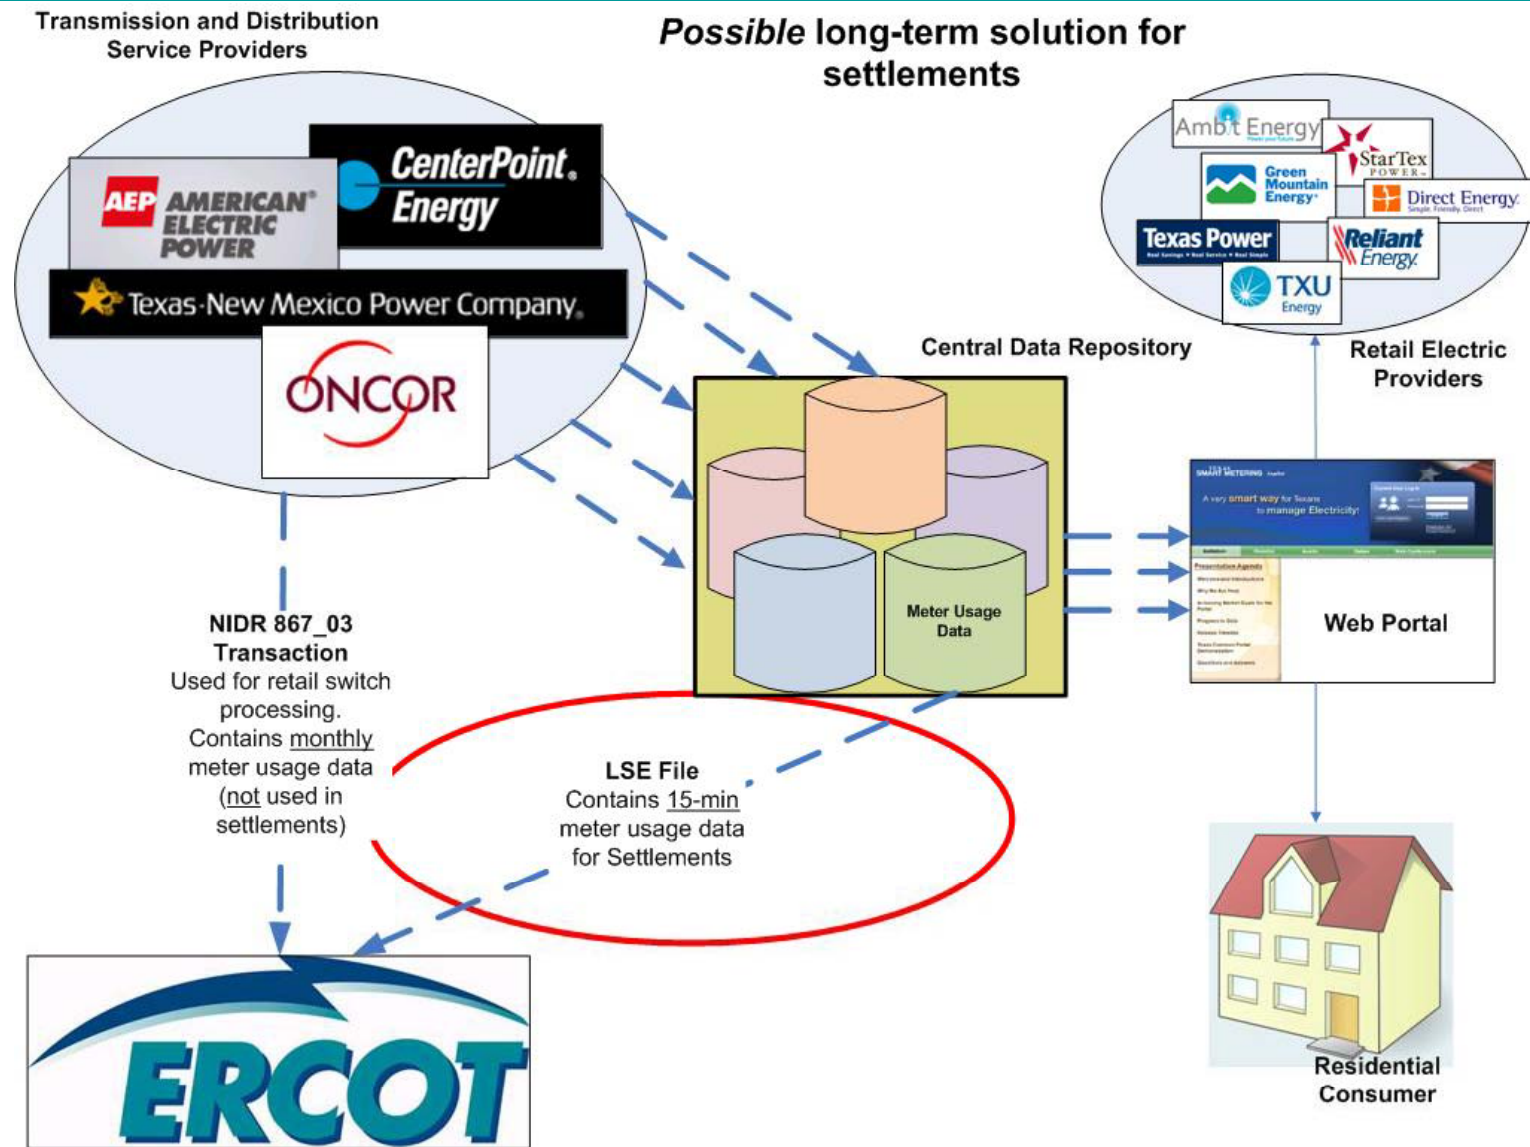

Process implemented with Interim Settlement Solution (PR80027_01)

- Based on the deployment schedules files with the PUCT non-IDR meters will be replaced with Advanced Meters.
- TDSPs will continue to submit TXSET transaction 867_03 containing monthly summary meter usage data for NIDR meters as this transaction will continue to be used for retail switch processing.
- With the implementation of ERCOT's interim settlement solution TDSPs will also submit an LSE file containing the interval usage data (15-min meter reads).
