# SAR-001 Provision to Give ERCOT ISO a Vote in the Processes

---

- **November 2, 2009 - FERC approved Texas RE's Standard Development Process changes to add ERCOT ISO as an Eighth Segment and to give ERCOT a  $\frac{1}{4}$  segment vote in the development of regional standards**
- **Implementation is nearly complete**
  - Reliability Standards Tracking Site modifications in process
  - Anticipated completion by the end of December, prior to next posting
  - No votes anticipated for 60 days

## SAR-003 Regional Standard BAL-001-TRE

---

- **This standard drafting team has two meetings scheduled for the rest of 2009 and one in January 2010 with a goal of having a second draft ready for RSC vote at their February meeting.**
- **The previous plan was for the RSC to vote in January, but due to the quantity of remaining work, the team decided that February was a more realistic goal.**
- **The RSC may vote to move it forward to a second comment period or may vote to move it to ballot depending on the significance of changes from draft one to draft two.**
