Texas Regional Entity Standards Report

Board of Directors

April 19, 2010

SAR-003 Regional Standard BAL-001-TRE
Real Power Balancing Control Performance

- **Comment period on second draft closed March 13.**

- **The team met on March 18 and April 14 to review comments received and discuss next steps.**

- **The team anticipates re-drafting the standard in light of the comments received and the FERC Orders from March.**

- **The next draft will be posted for comments when it is completed.**

Proposed SAR-008 – CIP-001-TRE-1
Sabotage Reporting

- **This Proposed Regional Variance applies the CIP-001 - Sabotage Reporting – Requirements to TO and GO.**
  - Intended to address issues remaining after completion of the LSE Registration and TOP JRO projects until NERC standard revision is completed (NERC Project 2009-01).
- **At its April 7 meeting, the RSC members questioned the need for the proposed CIP-001 Regional Variance.**
  - Stakeholders questioned whether a reliability gap actually exists, whether the GO function needs to be included, and suggested that TO coverage could be addressed through other means.
  - RSC did not vote at this time.
  - This regional variance may be reconsidered at a future meeting.

TEXAS REGIONAL ENTITY
