RE: PSEG Texas, LP letter to the Board of Directors dated March 12, 2010 concerning the Tier 2 Project

Dear Ms. Newton,

Exelon would like to comment on the ERCOT endorsed Tier 2 Project as set forth in the March 26, 2010, recommendation entitled: "ERCOT Independent Review Comanche Peak Congestion Mitigation Proposal". Although Exelon appreciates that the proposed upgrade will address adverse impacts on nuclear generation, we share PSEG's concerns regarding the lack of any consistent process and procedures for determining the necessity of transmission upgrades.

Given the temporary benefits of the project and the lack of a consistently applied process, we respectfully ask the Board to direct ERCOT to address the concerns outlined by PSEG and encourage both ERCOT and stakeholders to work together to create a process that can be applied consistently to future line upgrade evaluations. Exelon will make every effort to participate with ERCOT and stakeholders to better understand the need for this project and whether it is the most cost effective solution with the least market interference.

Sincerely,

Kristy Ashley
