

ELECTRIC RELIABILITY COUNCIL OF TEXAS, INC.
RISK MANAGEMENT EVENT PROFILE MATRIX (as of July 1, 2010)

 Strategic	 Operational Excellence	 Market Facilitation	 Grid Reliability	 Reporting	 Legal and Regulatory Compliance
 Strategy Development <i>Corporate objective setting adequately incorporates informed stakeholder input, market realities and management expertise.</i>	 Performance Monitoring <i>Clearly defined and actively monitored performance metrics linked to mission and goals - Performance status communicated and corrective action taken.</i>	 Customer Choice <i>Market design promotes efficient choice by customers of energy providers with effective mechanisms to change incumbent market participants as desired.</i>	 Grid Operations <i>Information required to operate the grid is efficiently gathered. Appropriate tools are prudently configured to efficiently operate the system.</i>	 Review Practices <i>Prudent measures are taken to insure that company disclosures are properly vetted and not misleading.</i>	 Legal & Legislative <i>Operations are conducted in compliance with all laws and regulations. Impacts of current and proposed legislation are understood and communicated.</i>
 Mission and Goals <i>Corporate objectives and performance standards are understood and followed.</i>	 Business Practices <i>Business planning, processes and management standards are effective and efficient.</i>	 Nodal Implementation Project <i>Nodal Implementation on budget on schedule, and within defined scope.</i>	 Planning <i>Long-range planning methods enable efficient responses to system changes that are necessary to maintain reliability standards.</i>	 Disclosure <i>Reporting and other disclosures to intended parties is timely, accurate and effective.</i>	 Internal Control Compliance <i>Internal Control Compliance processes and management standards are effective, efficient, and provide stakeholders with required assurances of quality.</i>
<i>Efforts to define the planning process for completing the 2011 budget are underway. Using the Market Reform assessment, we are reviewing the competencies needed to operate ERCOT through 3 different stages, readiness/go live: stabilization, stead state. This analysis will define the organization requirements and associated budgets needed for 2011 and 2012.</i>		<i>Full market trials functionality testing continues. 8-hr LFC test completed on schedule. Additional LFC tests have been added to the market trials schedule. Reporting support for DAM/RUC/SASM continues to be upgraded. ERCOT provided initial overview of system cut-over timeline to market participants in early June, with additional details scheduled for release in July.</i>	<i>Demand for planning studies exceeds ERCOT's ability to perform them. ERCOT has received two awards totaling \$3.5 million to produce long-term resource and transmission planning studies in 2011. Hiring resources to work on these studies has commenced.</i>		<i>Efforts underway to streamline and increase the effectiveness of ERCOT's internal controls program and integrate it with the company's Enterprise Risk Management program.</i>
 Reputation <i>Positive perceptions by stakeholders lead to less cost and greater flexibility resulting in enhanced enterprise value.</i>	 Workforce <i>Organization design, managerial and technical skills, bench strength and reward systems aligned with corporate goals.</i>	 Counterparty Credit <i>Maintain credit risk exposure for overall market within acceptable limits.</i>	 Bulk System Resources <i>Market Participants construct and make available adequate bulk electric grid resources.</i>	 Communication <i>Internal & external communications are timely and effective.</i>	 Industry Standards <i>Business and operational activities are in compliance with all applicable regulatory, financial and accounting requirements, standards and directives.</i>
<i>ERCOT addressing reputation issues by 1) refocusing communication efforts, 2) continuing to complete Nodal on time and on budget, 3) preparing a well thought out budget for 2011, and 4) increasing accountability.</i>	<i>We continuing to improve and enhance our performance management processes, talent management identification, succession planning and training initiatives. We have been working with our management team on all of these areas.</i>	<i>Credit risk reflected by the PFE model has been fairly consistent over the past year. Color remains yellow pending the review of risk factors (e.g. counterparty probabilities of default, impact of new markets and instruments, collateral levels, price volatility) in the Nodal market requested by F&A.</i>			<i>Received 2009 NERC audit report for the Operations and Planning (693) portion of the standards. Still waiting for the final 2009 NERC audit report for the Critical Infrastructure Protection (CIP) portion.</i>
 Fiscal Management <i>ISO design requires competent, prudent and cost effective provision of services.</i>	 Technology Infrastructure <i>Information systems, supporting facilities and data are effectively managed and are reliable.</i>	 Administration, Settlement & Billing <i>Market rules fairly applied to all participants. Accounting is timely and accurately reflects electricity production and delivery.</i>	 Operational Responsibility <i>Market participant conduct their operations in a manner which facilitates consistent grid reliability.</i>	 Adequacy and Integrity <i>Robust processes exist to support management assertions embodied within financial reports.</i>	 Regulatory Filings <i>Evidence, testimony and other supporting materials are compelling and successful.</i>
<i>ERCOT is currently forecasting a year-end positive budget variance in excess of \$7.0 million.</i>	<i>Systems remain stable. Sufficient system and computer room capacity exist for Nodal 'go-live'. Austin data center capacity is near maximum and may not be able to accommodate additional unforeseen expansion prior to switchover to Bastrop. Capacity requirements continue to be closely monitored.</i>		<i>There is still a lack of consensus over reactive power and frequency response requirements to existing wind generation resources. However, RTWG is planning to bring a draft of the Texas Renewables Integration Plan (TRIP) to TAC by mid-Summer.</i>		

Legend:  Elevated Risk Level

 Reduced Risk Level

Color Code Methodology for Ranking Residual Risk

Risk Rating	Risk Tolerance	Description of Residual Risk			Mitigation Plan Effectiveness
		Impact	Likelihood	Threat (impact x Likelihood)	
Green	Fully within	Low to none	Low	None	Effective
Yellow-Green	Outside	Low	Low to none	Minimal	Effective
Yellow	Outside	Low to medium	Low to medium	More than minimal but not likely to jeopardize company goals	Effective
Yellow-Red	Significantly Outside	High	Reasonable probability	Would jeopardize company goals	Inadequate
Red	Significantly Outside	High	Substantial probability	Would jeopardize company goals	Inadequate
