

Information Technology and Facilities Report

Richard Morgan
Vice President & CIO

ERCOT Board of Directors
August 17, 2010

Highlights

- **Service Availability:**
 - Performance continued at high levels with only the Retail Transaction processing not meeting or exceeding expectations.

- **Wide Area Network Assessment:**
 - Cannon group performed ERCOT Telecommunications assessment
 - Findings / Outcomes:
 - ERCOT's Telecom environment meets or exceeds operational standards and cost of service within peer group
 - ERCOT's contracts rated "competitive" or "highly competitive" in all service areas
 - Rates and charges are compliant, i.e. bills match contracts

- **New Data Centers:** Construction of the new data centers in Bastrop and Taylor continues to be on schedule and under budget.
 - Commissioning of Bastrop and TCC3 data centers underway
 - Fiber connection between TCC1 and TCC3 is installed

Highlights

- **Network Model Management System (NMMS)**
 - **Stability and Performance:**
 - System stability significantly improved from June
 - 13 unplanned restarts in July vs. 96 in June
 - Performance improvements implemented August 1st
 - Test timings of 30 typical functions
 - 26 showed significant improvement averaging 50%
 - 3 functions decreased in performance by 25%
 - Code to monitor availability and response times will be deployed in August
 - **Topology Processor Defect:**
 - Continue to work with vendor to isolation and resolve

- **Nodal 5-Hour System Reliability and Market Test:** Nodal 5-hour Load Frequency Control (LFC) test was completed as part of Market trials on 7/21
 - Emergency patch to fix Shift Factor issues (noted during previous 8-hour tests) performed to expectations.

2010 Net Service Availability

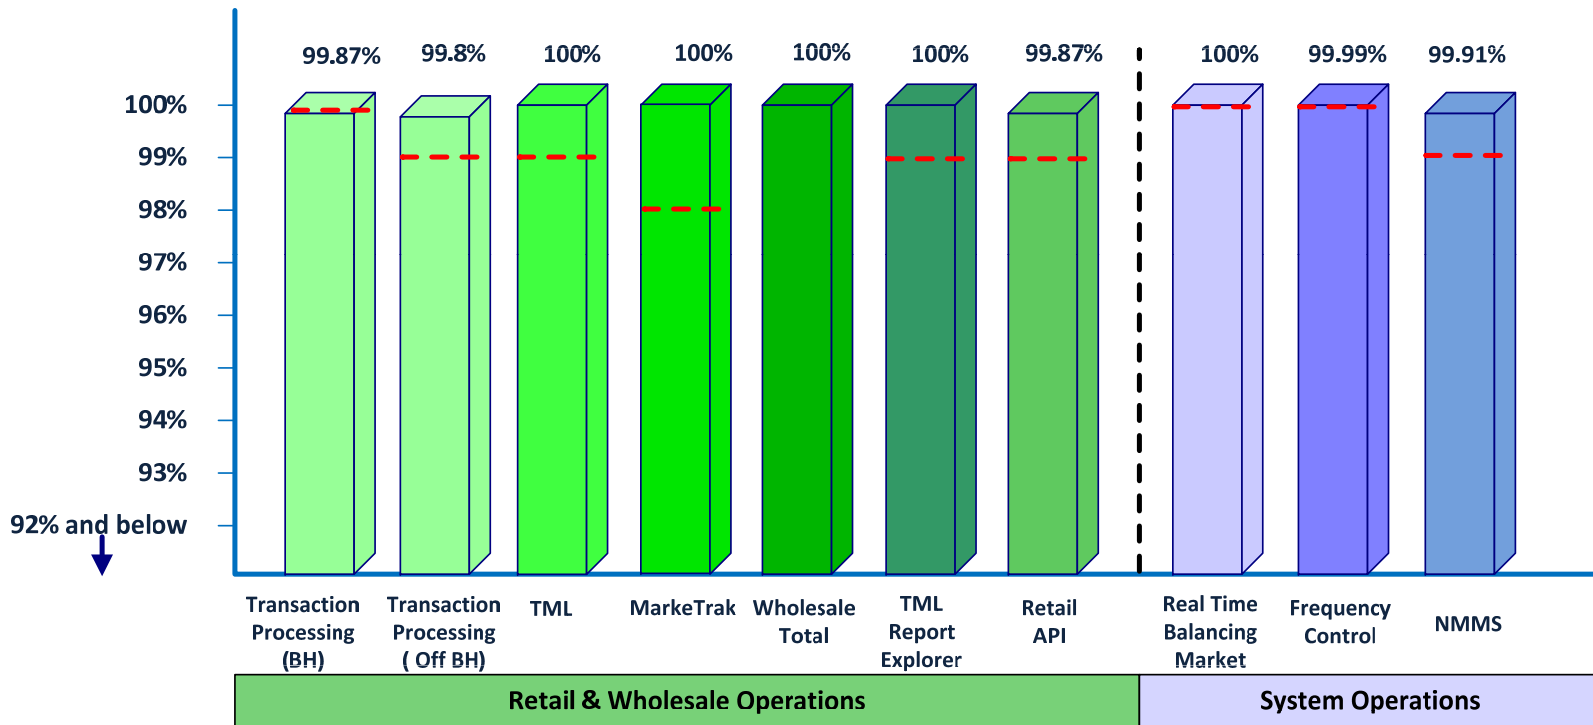

2010 Net Service Availability Through July 31st, 2010

Transaction Processing SLA Target	TML SLA Target:	99%	RTBM Target:	99.93%	
- Business Hours (BH):	99.9%	MarkeTrak SLA Target:	98%	Frequency Control Target:	99.93%
- Off Business Hours (Off BH):	99%	TML Report Explorer SLA Target:	99%	NMMS Target:	99%
		Retail API SLA Target:	99%

Network Model Management System

July 2010 Network Model Management System (NMMS) Availability Summary

7/1 – 7/31 (39 Minutes): NMMS was impacted with 39 minutes of outage due to 13 restarts in July. The recurrence of restarts has declined significantly from June. Fixes include the following: A parameter was modified on 7/2 which resolved a memory management defect. A patch was applied on 8/1 to resolve a navigation performance issue. ERCOT continues to work with the vendor closely and is actively monitoring the system.

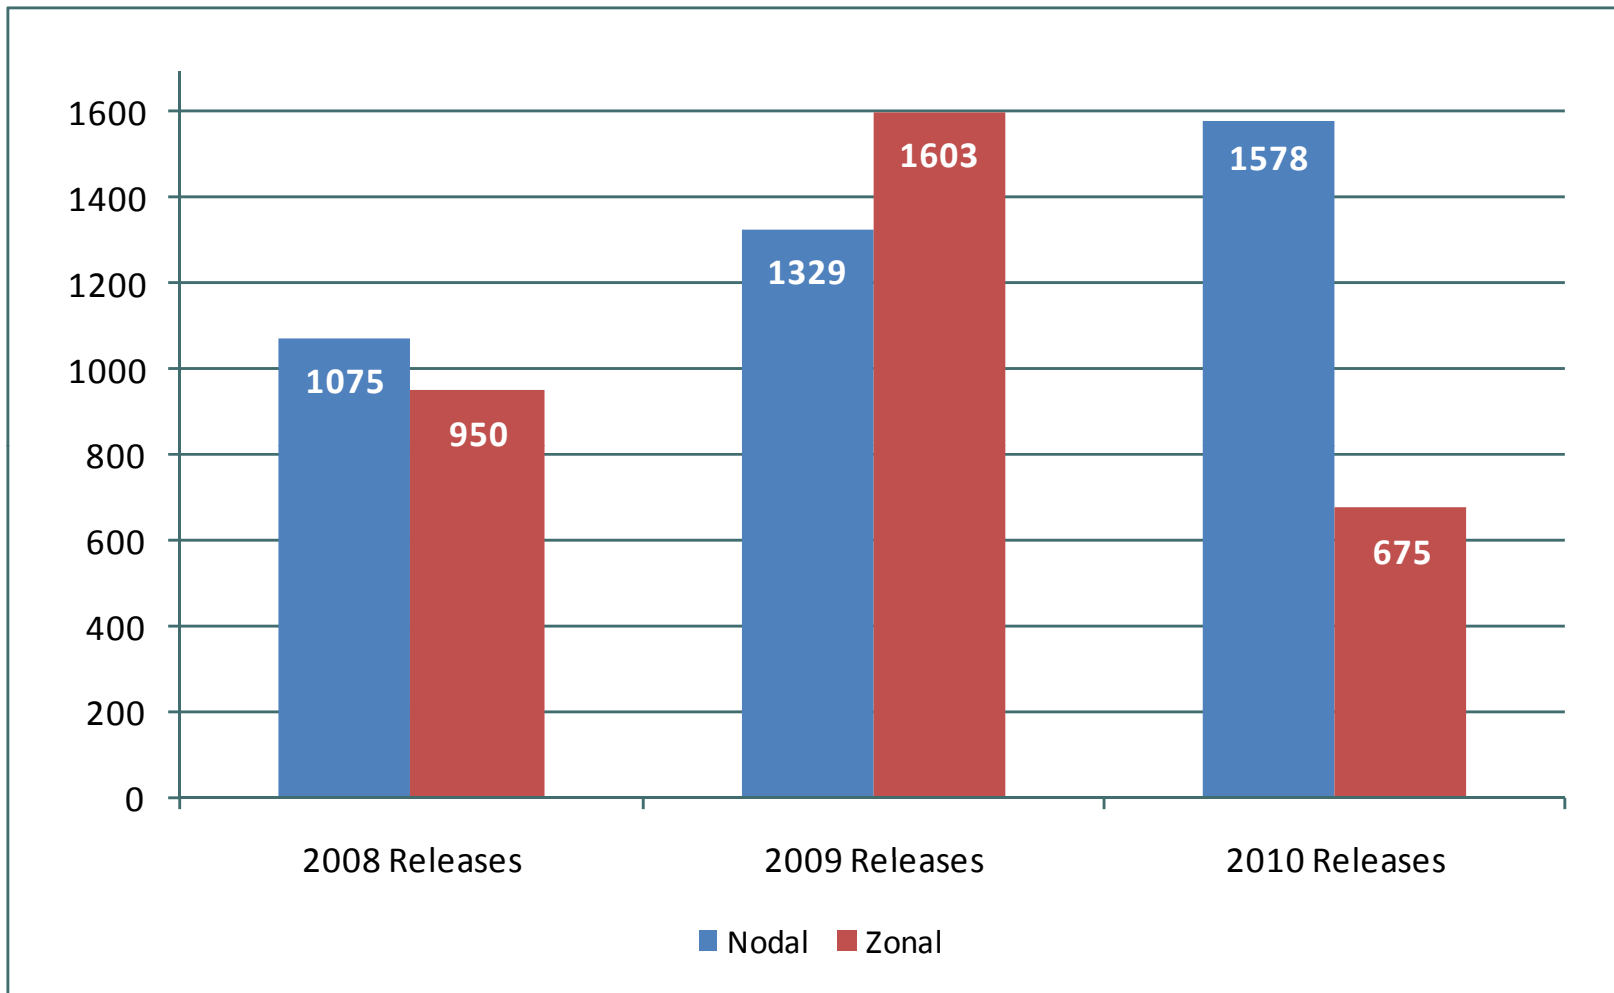

Release Management Metrics (3-Year Releases by Month)

■ 2008 Actuals ■ 2009 Actuals ■ 2010 Actuals

Release Management Metrics (Nodal vs. Zonal Releases)

Note: 2010 metrics are YTD

Bounce Rate: % of single page visits; **Completed Goals:** Measure of specific predefined actions completed by visitors;
% Change: % change in visits relative to previous month

Metrics Guide – Nodal Production

- **Aggregate Energy Management System (EMS)**
 - Measure of the availability of the software that provides real time grid control capability. Calculated as average of deployed & monitored components availability
- **Outage Scheduler**
 - Measure of the availability of the software to manage the submission, modification, deletion of schedules for various types of transmission and generation systems outages
- **Network Model Management System (NMMS)**
 - Measure of the availability of the software to manage the ERCOT network model. Calculated as availability of model management core engine (IMM)
- **Congestion Revenue Rights (CRR)**
 - Measure of the availability of the software to manage the financial instruments that help Market Participants hedge against losses due to transmission constraints
