

NPRRs

- **312NPRR Clarification of QSE Requirements for Split Generation Resources.** This NPRR defines Master QSE, clarifies the designation and responsibilities of the Master QSE for a Generation Resource that has been split to function as two or more Split Generation Resources, and clarifies the responsibilities of the QSEs for such Split Generation Resources. This NPRR also addresses Settlement and billing disputes related to the application of integrated Real-Time telemetry from a Generation Resource that has been split to function as two or more Split Generation Resources
- **322NPRR Real-Time PTP Option Modeling.** This Nodal Protocol Revision Request (NPRR) modifies Point-to-Point (PTP) Options in the Day-Ahead Market (DAM) that have been declared by a Non-Opt-In Entity (NOIE) before the DAM execution to be settled in Real-Time and are still held by that NOIE in Real-Time such that they are considered as PTP Obligations for purposes of the DAM model. Settlement of Real-Time PTP Options remains unchanged.

NPRRs

- **340 NPRR Unannounced HSL test for Duration-Limited Resources.** This Nodal Protocol Revision Request (NPRR) defines Duration-Limited Resource and amends the General Capacity Testing Requirements to reflect operational characteristics of this type of Resource.
