Pursuant to Public Utility Regulatory Act § 39.905 and Public Utility Commission of Texas Substantive Rule § 25.181, the Energy Efficiency Cost Recovery Factor (EECRF) is a non-bypassable charge applicable to all Retail Customers.

**METHOD OF CALCULATION**

EECRF charges shall be calculated annually and shall equal by rate class the sum of: forecasted energy efficiency costs not in base rates, any adjustment for past over-recovery or under-recovery of EECRF costs, any energy efficiency performance bonus, and evaluation, measurement, and verification (EM&V) costs allocated to the Company by the Public Utility Commission of Texas; divided by the forecasted billing units for each class.

**MONTHLY RATE**

A Retail Customer’s EECRF for the billing month shall be determined by multiplying the appropriate EECRF charge shown below by the Retail Customer’s applicable billing unit for the current month.

<b><u>Rate Class</u></b>	<b><u>EECRF Charge</u></b>
Residential Service	\$0.001214 per kWh
Optional Residential Service	\$0.001214 per kWh
Secondary Service	\$0.000516 per kWh

The amount to be billed is determined by multiplying the kWh delivered to Retail Customers of the Competitive Retailer by the appropriate EECRF charge.
