

2014 WMS Goals
Revised Draft 12/11/13

1. Assist in the development of appropriate Resource Adequacy related market changes.
 - TAC Resource Adequacy directives
 - Monitor whether enhancements are working
2. Explore market design enhancements and monitor ongoing market improvements.
3. Review market performance to ensure outcomes are consistent with design.
 - Out-of-market actions
 - Competitive vs. non-competitive solutions
4. Accommodate the expansion of demand response and emerging technologies.
5. Explore ways to improve credit practices.
6. Promote open access to ERCOT markets.
7. Explore ways to enhance the concept of generation alternatives as a part of the analysis for transmission planning.
8. Assist in the development of appropriate Ancillary Service market redesign changes.
9. Review State of the Market Report and consider necessary recommendations.
