English	21-Nov-16	I generating electricity via solar panels and excess generation is shown under code A29. How do I look at A29 data on smart meter texas?
English	21-Nov-16	I'm surprised this ability is not available yet, but it would be helpful to be able to set thresholds and receive a e-mail/text when reaching a certain kWh throughout the month. After working at a utility for over 7 years and now in the field of energy efficiency I definitely see the need and importance for customers to be able to easily track their own usage. Please let me know how I can help make this possible. Thank you. -
