English	29-Dec-16	suggestion: It would be very helpful if I could see total usage using the same dates as my billing cycle. Currently the report function does not give a total kw usage for a specified period of time, I have to calculate that total myself. The monthly report would meet the need if it would allow me to enter a specific time period. For example my billing cycle is 11/12 thru 12/13. The only way I can get my total usage for that time period is to calculate it myself. The daily usage graph would be more meaningful if the day of the week was displayed along with the date. For example: I could at a glance be able to compare my weekends to weekdays.
English	27-Dec-16	It would be great to update the website with a feature to retrieve, display & export generated electricity data from the smartmeter where homeowner has solar panel. This will be very useful for us so we can have accurate data to track how much electricity is generated and send to the grid. Regards,
English	27-Dec-16	I need to speak with someone but there is no contact info on this site. Please help
English	26-Dec-16	can I get my meter set up for net its shows to be capable of in out dg already I have called once
