English	10-Jan-17	Can you please check if my electric meter works properly. I got 2262kwh electricity on my bill and this way higher than I have ever spend. I live in a 2 room apartment.
English	7-Jan-17	Although the site allows the user to enter the start and end date to get the daily usage over a period of time, that functionality does not work. After entering 12/21/2016 and 1/05/17 for my account and then clicking on "Update Account", the site only returns the daily usage for 1/05/17. Because this functionality does not work, I am unable to manage my monthly usage to minimize my monthly electric bill (due to the different prices charged at different levels of usage). Please advise when this functionality will be corrected. Thanks.
