Credit Work Group Update – Reviewed NPRRs

- **NPRRs Reviewed Without Credit Impact (email vote)**
 - NPRR 871 – Customer or Resource Entity Funded Transmission Projects Review Process
 - NPRR 882 – Related to PGRR067, Procedures for Wind and Solar Equipment Change
 - NPRR 884 – Adjustments to Pricing and Settlement for Reliability Unit Commitments (RUCs) of On-Line Combined Cycle Generation Resources
 - NPRR 892 – Non-Spin Reserve Energy Floor Clarification.
 - NPRR 893 – Clarification of Fuel Index Price and Incorporation of System-Wide Offer Cap and Scarcity Pricing Mechanism Methodology into Protocols
 - NPRR 897 – Adjustments to Black Start Service (BSS) Procurement Timeline and Testing
 - NPRR 898 – Modify Language on Returning Original EPS Metering Site Certification Documents to the TDSP
 - NPRR 899 – Digital Certificate and User Security Administrator Clarifications and Opt Out Procedure
 - NPRR 901 – Switchable Generation Resource Status Code

NPRR 850 – Market Suspension and Restart

- ERCOT employed stakeholder feedback to develop a principles-based approach to Market Suspension and Market Restart.
- ERCOT has drafted proposed language to handle collateral requests during the transition from pre-to post-market restart. Credit considerations include:
 - ERCOT given sole discretion to set an Unsecured Credit Limit for Counter-Parties not otherwise eligible
 - Waive in part or in full the requirement for Counter-Parties to maintain designated amounts of Secured and/or Remainder Collateral
 - Forego the requirement to provide prompt notice to Counter-Parties of the need to increase Financial Security
 - Extend the timelines to allow Counter-Parties to make arrangements to provide collateral, without unmet requests for collateral being designated as Late Payments
- As of December 2018, NPRR 850 is tabled at PRS and referred to Credit Work Group and Market Settlement Working Group.
- Credit Work Group will review NPRR 850 in detail, including recently filed comments, at its December 2018 meeting.

Review of 2018 Credit Working Group Goals

- Review the implementation of NPRR800, the incorporation of a forward price curve-based methodology in collateral requirement calculations
- Provide support to the ERCOT stakeholder process for Market Suspension and Restart (NPRR850)
- Clarify the market's risk tolerance/appetite level and provide regular updates on credit exposure to the ERCOT Board
- Evaluate and quantify potential market risk under current credit rules and examine a framework for reviewing rules in flight
- Explore potential usage of letter of credit/credit insurance
- Pursue a calculator to allow market participants to calculate their requirements for CRR auctions

Other CWG Topics for Discussion

- ERCOT is working on preparing a scenario analysis of the expected credit exposures in a ‘stressed’ market, however actual market events have largely matched the stress case scenarios and actual market data may offer better opportunities for analysis than the scenario data. ERCOT will revisit the ‘stressed’ market scenario at a later date.
- A simulated ‘mass transition’ exercise is in the planning stage for late 2018 or early 2019 to be held in conjunction with the TDSPs and POLR REPs in each of the competitive load zones. Lessons learned from the Breeze Energy mass transition and May 2018 desktop exercise will be incorporated into the new exercise. Approximately 10,000 ESI IDs are anticipated to be included in the exercise.
