

Application for Load Serving Natural Gas-Fired Electric Generation

DUE TO UTILITY ON OR BEFORE MARCH 15, 2019

This Application should be completed in order to request the designation of Load Serving Natural Gas-Fired Generation. A separate Application must be submitted to each utility. Do not include premises served by different utilities in a single Application.

The designation should be requested only for those premises that directly provide natural gas to electric generation, such as a natural gas compressor station, gas control center, or other pipeline transportation infrastructure. It is not intended to apply to field services. **Designation of a load does not guarantee an uninterrupted supply of electricity.** It is the responsibility of the customer to make arrangements for alternative sources of electric power should a localized outage or load shed event occur.

The utility may request more information prior to implementing a designation.

UTILITY NAME

CUSTOMER CONTACT INFORMATION

Contact Name:

Contact Title:

Mailing address (if different from Service Address):

Work Number:

Cell Number:

E-Mail Address:

SERVICE ADDRESS
