

## **TPL-007-3 R11 and R12 Discussion**

March 3, 2020  
PGDTF Meeting

# ERCOT Proposed Process for R11

- TSPs will provide ERCOT the location of all GIC monitors on their systems.
- TSPs will notify ERCOT of any changes to their GIC monitors, including the installation of any new GIC monitors.
- TSPs who own GIC monitors will provide ERCOT the GIC monitor data upon request.
- ERCOT will not request more information than the NERC GMD data collection request, and will not start the first request before the first NERC GMD data collection period.
- The ERCOT data collection will be a request-based process instead of an annual process.
- TSPs who own GIC monitors will be solely responsible for responding to the NERC GMD data collection request.

# ERCOT Proposed Process for R12

- TSPs will provide ERCOT the location of all magnetometers on their systems.
- TSPs will notify ERCOT of any changes to their magnetometers including the installation of any new magnetometers.
- TSPs who own magnetometers will provide ERCOT the geomagnetic field data upon request.
- ERCOT will not request more information than the NERC GMD data collection request, and will not start the first request before the first NERC GMD data collection period.
- ERCOT will develop a process to collect geomagnetic field data from publicly available sources if no TSPs in the ERCOT region own any magnetometers.
- The ERCOT data collection will be a request-based process instead of an annual process.
- TSPs who own magnetometers will be solely responsible for responding to the NERC GMD data collection request.
