

NDSWG Report to ROS August 2020

NDSWG last met on July 21, 2020 (Webex)

31 callers on Webex

Discussion/Review Items:

Relay Loadability Ratings

- Initial submission spreadsheets have been sent back to TDSPs for review
- Additional changes will need to be submitted via NOMCR
- Current completion rate of 77% for TDSPs, 83% for REs
- Operations will start using RLR on 09/02/20, current values already being tested

Updates on Contingency Process

- Standard Contingency List is being updated to include info like From/To substations, will post both old and new formats during transition

DGR Modeling Process

- Presentation on Ideal Telemetry Submission for DGRs

RTU Maintenance Process

-Presentation on RTU E-mail Template

-Goal is to provide situational awareness when RTUs are taken offline by using e-mail template for outage requests

New DPC Request Form

-New form to be attached to all DPC submissions in NMMS

Future NDSWG meeting: August 18, 2020 (Webex)
