

Emergency Conditions List from TAC/WMS

- Three Categories of items for SAWG:
 - 1. Efforts to include risk, extreme weather and impacts of Winter Storm Uri into CDR, SARA and reserve margin reports
 - Plan: Address through ongoing efforts at SAWG
 - 2. Planning items including load forecast methodology and transmission planning studies
 - Plan: Possible joint meeting with PLWG
 - 3. Gas item: “How should capacity reports be modified to include gas market coincident and offsetting risks with electric system?”
 - Plan: Continue to coordination with ERCOT and GEWG
 - SAWG plan likely limited in scope to adding a reserve margin report scenario with a certain percentage of fuel unavailable over events of certain amounts of time (hours or days)
