PUC DOCKET NO. 52709

6 MONTH INTERIM TRUE-UP § PUBLIC UTILITY COMMISSION
COMPLIANCE FILING FOR TEXAS §
STABILIZATION M BONDS, §
SERIES 2021 – DEFAULT CHARGES §
OF TEXAS

ELECTRIC RELIABILITY COUNCIL OF TEXAS, INC.'S
SIX-MONTH INITIAL TRUE-UP COMPLIANCE FILING,
REPORT OF RECOVERIES, AND NOTICE OF DEFAULT
CHARGE ADJUSTMENT

Pursuant to the Debt Obligation Order adopted by the Public Utility Commission of Texas (the Commission) in Docket No. 52321\(^1\) (hereinafter, the Debt Obligation Order), Electric Reliability Council of Texas, Inc. (ERCOT), as the servicer of the bonds issued under Subchapter M of Chapter 39 of the Public Utility Regulatory Act (the Servicer), hereby submits its initial six-month interim true-up filing and notice of default charge adjustment (True-Up Filing). In support of this True-Up Filing, the Servicer respectfully shows as follows:

I. Background

On July 16, 2021, ERCOT filed an application for a debt obligation order under Subchapter M of Chapter 39 of the Public Utility Regulatory Act (PURA) to securitize extraordinary costs incurred due to Winter Storm Uri. That proceeding was assigned Docket No. 52321. On November 14, 2021, the Commission issued a Debt Obligation Order that authorized the issuance of the debt obligations in an aggregate amount of up to $800 million (the Uplift Balance) and approved the assessment of default charges to all wholesale market participants (except those expressly exempted by PURA) in an amount sufficient to ensure the recovery of amounts expected to be necessary to timely provide all payments of debt service and other required amounts and charges in

---

\(^1\) Application of the Electric Reliability Council of Texas, Inc. for a Debt Obligation Order Pursuant to Chapter 39, Subchapter M, of the Public Utility Regulatory Act, Docket No. 52321, Final Debt Obligation Order, Findings of Fact Nos. 67-71 and 74 and Ordering Paragraphs Nos. 15 and 15A (Nov. 14, 2021) [hereinafter Final Order].
connection with the issuance of the debt obligations. In accordance with the Debt Obligation Order, Texas Electric Market Stabilization M Funding LLC (the Issuer) issued on November 12, 2021, the Texas Stabilization M Bonds, Series 2021 (the Stabilization M Bonds) in an aggregate principal amount of $800 million. The Servicer began billing default charges, consistent with the requirements of the Debt Obligation Order, in January 2022. As Servicer for the Issuer, ERCOT bills, collects, receives, and adjusts the default charges imposed pursuant to the Default Property Servicing Agreement (the Servicing Agreement) that was entered into between the Issuer and the Servicer, dated November 12, 2021. The Servicer remits default charges received to the Indenture Trustee to repay the Stabilization M Bonds. The Debt Obligation Order, ERCOT Protocols, and the Servicing Agreement set out the terms and conditions under which the default charges will be billed and collected with respect to the Stabilization M Bonds.

The Debt Obligation Order requires the Servicer to review and adjust default charges to correct for any under-collections or over-collections and to ensure the expected recovery of amounts sufficient to produce substantially level annual debt service over the expected interest and amortization periods of the Stabilization M Bonds to timely provide all payments of debt service.\(^2\) True-up adjustments are based on cumulative differences, regardless of the reason, between the periodic payment requirements and the amount of default charge remittances made to the Indenture Trustee by the Servicer. In accordance with the Debt Obligation Order, the Servicer is providing this initial Six-Month Calculation and notice of adjustment.\(^3\)

This True-Up Filing reflects a need to increase default charges. Up-front costs in excess of those estimated were incurred in connection with the initial issuance of the Stabilization M Bonds.

\(^2\) Id.

\(^3\) Id. at Finding of Fact No. 67 and Ordering Paragraphs Nos. 15 and 15A.
As more fully detailed in ERCOT’s Final Accounting of Up-Front Costs – Subchapter M\(^4\) after netting saving against increased cost, net issuance cost were in excess of estimates by $195,000.

Any capitalized terms not otherwise defined herein shall have the meanings ascribed to them in the Debt Obligation Order.

II. Recoveries

The Debt Obligation Order also requires the Servicer to periodically report on amounts repaid by, or recovered from, market participants whose unpaid obligations from the period of emergency were included in the Stabilization M Bonds so that, consistent with PURA Section 39.603(c), amounts repaid or recovered can be used to pay portions of the default charges over the remaining term of the Stabilization M Bonds.\(^5\)

See the Recovery Report, attached as Attachment 1, reflecting that to date there has been a recovery of unpaid obligations in the total amount of $1,113,935.

III. Right to Redeem the Stabilization M Bonds in Whole or in Part

The Servicer has the option to use any excess collections to prepay the Stabilization M Bonds if prepayment does not involve penalties, but to the extent that prepayment involves penalties or refinancing is impossible, the Servicer is not required to prepay the Stabilization M Bonds.\(^6\) In negotiating with the Texas Comptroller of Public Accounts (the Initial Purchaser) the terms of the Stabilization M Bonds, the Servicer received the right to redeem the Stabilization M Bonds, in whole or in part, without penalty or premium for the first 3 years the Stabilization M Bonds are outstanding or as long thereafter as the Initial Purchaser still holds the Stabilization M Bonds. Redemption of the Stabilization M Bonds involves their reissuance and the re-amortization of the reduced principal of

\(^4\) Application of the Electric Reliability Council of Texas, Inc. for a Debt Obligation Order Pursuant to Chapter 39, Subchapter M, of the Public Utility Regulatory Act, Docket No. 52321, Final Accounting of Up-Front Costs – Subchapter M (Jan. 11, 2022) [hereinafter Final Accounting].

\(^5\) Final Order, supra note 1, at Finding of Fact No. 69.

\(^6\) Id. at Finding of Fact No. 49.
the Stabilization M Bonds. It is anticipated significant costs would be incurred in such a partial redemption by both the Servicer and the Initial Purchaser of the Stabilization M Bonds. Since the Servicer can use recovery amounts to pay a portion of the default charges over the remaining term of the Stabilization M Bonds or redeem a portion of the Stabilization M Bonds, the Servicer has elected to deposit the recovered amounts in a recovery account with the Indenture Trustee to be invested in eligible investments pending the timely resolution of several remaining recovery actions which are in litigation. When a greater portion of the anticipated recovery amounts is realized, the Servicer will analyze whether to redeem a portion of the Stabilization M Bonds or use the recovered amounts to pay a portion of the default charges over the remaining term of the Stabilization M Bonds based on a subsequent review. If the Servicer determines the remaining recovery actions will not be resolved so that a significant portion of the Stabilization M Bonds can be redeemed in an efficient fashion during the period the Stabilization M Bonds can be redeemed without premium, the Servicer may use the recovered amounts to pay portions of the default charges over the remaining term of the Stabilization M Bonds. This determination would be based on which treatment of the recovered amounts results in the lowest financing costs.

IV. Purpose of Filing and Jurisdiction

The Servicer is submitting this its initial Six-Month True-Up Filing in accordance with Debt Obligation Order, Finding of Fact No. 67 and Ordering Paragraph No. 15A. The Commission has jurisdiction over true-up calculations and adjustments pursuant to PURA § 39.603.

V. Notice

In accordance with Section 4.01(e)(i)(B) of the Servicing Agreement, a copy of this True-Up Filing is being sent to the following parties:

Attn: Corporate Trust Services

VI. Six-Month Calculation & True-Up Adjustment

Findings of Fact Nos. 67-71 & 74 of the Debt Obligation Order set forth the procedures related to mandatory interim true-up calculations and true-up adjustments. Finding of Fact No. 67 and Ordering Paragraphs 15 and 15A of the Debt Obligation Order requires the Servicer to provide an initial six-month true-up calculation (the Six-Month Calculation) six months following the closing of the Stabilization M Bonds. If the Six-Month Calculation projects under-collections of the default charges, the Servicer must implement a true-up adjustment in accordance with the standard true-up procedure for the remainder of the initial annual-true-up period.

The initial Six-Month Calculation requires the Servicer to (i) calculate under-collections for the interim period by subtracting the interim period's default charge revenues collected from the periodic billing requirement determined for the same period; (ii) estimate any anticipated under-collections for remaining interim period; (iii) calculate the periodic billing requirement for the remaining interim period, taking into account the total amount of prior and anticipated under-collection amounts described in steps (i) and (ii) above, and calculate the monthly amortization amount for the periodic billing requirement; and (iv) assess the updated monthly amortization amount to each Qualified Scheduling Entity (QSE) and Congestion Revenue Right (CRR) account holder in accordance with the default charges assessment methodology. The required Six-Month Calculation is provided on Attachment 2 and the accompanying Work Papers and results in an increase of the monthly default charges from $3,713,235 to $3,761,985.
VII. Timing of Six-Month Calculation and Effective Date of True-Up Adjustment

The Servicer is required to provide the Six-Month Calculation six months following the closing date of the Stabilization M Bonds, which occurred on November 12, 2021. Therefore, this Six-Month Calculation is timely filed.

In addition to filing the Six-Month Calculation, the Servicer is required to file notice regarding mandatory interim true-up adjustments with the Commission not less than forty-five (45) days prior to the first billing cycle of the month in which the revised default charges shall come into effect. The Servicer proposes an effective date of the revised default charges for the July 2022 billing period. In accordance with Finding of Fact No. 74 of the Debt Obligation Order, the Commission has fifteen (15) days after the date of this filing to confirm the true-up adjustment complies with PURA and the Debt Obligation Order. Any true-up adjustment filed with the Commission is effective on its proposed effective date, which will not be less than fifteen (15) days after filing. Any necessary corrections to the adjusted default charge due to mathematical errors in the calculation of the default charge will be made in future true-up adjustments.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]
VIII. Conclusion and Prayer

Based on the foregoing, the Servicer respectfully requests that the Commission or another Presiding Officer with delegated authority issue an order confirming this True-Up Filing complies with PURA and the Debt Obligation Order.

Respectfully submitted,

WINSTEAD PC
