

Texas Advisory and Notification System (TXANS)

TXANS will:

- Deliver clear and reliable information to the public about ERCOT grid conditions
- Provide proactive updates on future weather and grid conditions where demand is forecasted to be higher and reserves could potentially be lower
- Educate Texans about the actions they can take to reduce energy usage to support grid reliability during these periods of high demand

Grid Condition Levels

TXANS Notifications

WEATHER WATCH

What is an ERCOT Weather Watch?

An ERCOT Weather Watch is an earlier (approximately 3-5 days ahead) notification of forecasted significant weather and high demand.

When is an ERCOT Weather Watch issued?

ERCOT will continue to monitor forecasted conditions, and if conditions determine a need, ERCOT may issue an ERCOT Weather Watch.

What to do when an ERCOT Weather Watch is issued

Continue to monitor grid conditions. View tips at [ERCOT.com/TXANS](https://ercot.com/TXANS) on how to save on your energy usage during forecasted high demand periods.

VOLUNTARY CONSERVATION NOTICE

What is a Voluntary Conservation Notice?

A Voluntary Conservation Notice is a call for Texans to voluntarily reduce energy usage during peak demand, if safe to do so.

When is a Voluntary Conservation Notice issued?

ERCOT will continue to monitor forecasted conditions, and if conditions determine a need, ERCOT may issue a Voluntary Conservation Notice.

What to do when a Voluntary Conservation Notice is issued

Voluntarily conserve power during specific conservation period, if safe to do so. View tips at [ERCOT.com/TXANS](https://ercot.com/TXANS) on how to save on your energy usage during forecasted high demand periods.

CONSERVATION APPEAL

What is a Conservation Appeal?

A Conservation Appeal is an elevated request for Texans to reduce their energy use during periods of peak demand and low reserves, if safe to do so.

When is a Conservation Appeal issued?

ERCOT will continue to monitor forecasted conditions, and if conditions determine a need, ERCOT may issue a Voluntary Conservation Notice.

What to do when a Conservation Appeal is issued

Conserve power during the specified appeal period, if safe to do so. Use the tips on the [ERCOT.com/TXANS](https://ercot.com/TXANS) webpage to save energy during periods of high demand. Monitor grid conditions on ercot.com or the mobile app.
