

ERCOT GTC Updates

Yunzhi Cheng
ERCOT Operations Support

ROS Meeting
10/5/2023

Recent GTC Updates

- Wharton GTC update (10/4/2023)
 - Based on 2022 Q4 QSA study with additional generation resources in the Wharton area
 - Wharton GTC interface remains unchanged
 - GTL update
 - No change for no prior outage condition
 - GTLs updated for affected prior outage conditions

Recent GTC Updates

- McCamey GTC update (10/4/2023)
 - Some transmission topology changes associated with a new 345kV station and the 2nd ckt of Bakersfield – Big Hill 345kV line.
 - No limit (GTL) changes
 - McCamey GTLs will be updated once all the segments of the 2nd ckt of Bakersfield – Big Hill 345kV line are in service

Bearkat GTC Retirement

- ERCOT Operations Support performed a stability assessment for the Bearkat GTC including the impact of the new Bearkat – Long Shore 345kV single ckt line. The results indicate the Bearkat GTC will not be needed after this new line is energized
- ERCOT intends to retire the Bearkat GTC when this new line is energized
- ERCOT will issue a market notice once a more defined energization schedule of this new line is available
