OD 9/6/2023 ERCOT Resource Mix

ESR Response Critical Amidst Scarcity Conditions (OD 9/6/2023)

ESRs are Valuable Tools for the Grid

- Though not a large percentage of total energy in ERCOT, the fast-ramping capability of ESRs can be crucial during scarcity events
 - to arrest frequency decay
 - to allow time for additional resources to come online
 - to allow time for ERCOT operations to respond
 - to prevent EEA events and cascading failures
