A New Kinney GTC

- 2023 Q3 QSA identified the stability constraints due to a new Generation Resource connected to 138-kV grid at Kinney county.
- A follow up GTC study confirmed the need to establish the Kinney GTC to address the stability constraints under N-1 and N-1-1 conditions
- This GTC is not IROL.
- This GTC became effective on Nov. 1, 2023. This GTC interface and associated Generic Transmission Limit (GTLs) are available in the posted Generic Transmission Constraints Methodology.
