

Item 5.1: Review of Requirements for Annual System and Organization Control Audit

Betty Day

Vice President, Security and Compliance
Chief Compliance Officer

Finance and Audit Committee Meeting

ERCOT Public

December 18, 2023

Finance and Audit Committee Request

Why this is being presented today:

ERCOT Protocol Section 1.4.3.1(1) requires an annual System and Organization Control (SOC) audit regarding ERCOT's market Settlement operations be performed by an external certified public accounting firm; and the ERCOT Finance and Audit (F&A) Committee Charter requires the Committee provide a recommendation to the Board whether the Company's annual SOC audit report should be accepted

ERCOT staff requests a vote from the F&A Committee to recommend that the Board accept the 2023 SOC audit report

The confidential SOC audit report is provided in the Committee's Executive Session materials. The results of the 2023 audit include:

1. An unmodified opinion
2. No reportable exceptions

Vote to follow presentation of item 5.2 by Weaver and Tidwell, LLP (Weaver)

SOC Audit Background

- Statement on Standards for Attestation Engagements No. 21 (SSAE 21) is the American Institute of Certified Public Accountants (AICPA) audit standard for reporting on controls at service organizations
- SSAE 21 examinations are performed by an independent auditor who assesses the description of the system, and the suitability of the design and operating effectiveness of controls, at an organization that provides services to user entities when those controls are likely to be relevant to user entities' internal control over financial reporting (ICFR)
- Market Participants rely on ERCOT's market Settlements and Billing processes, as the results impact their financial statements. Therefore, ERCOT's System and Organization Control (SOC) examination report provides critical information to user entity financial executives and their financial auditors
- The result of a SOC examination is a report, which includes an opinion letter from the auditor, on controls placed in operation at the service organization. ERCOT's SOC 1, Type 2 audit covers the controls surrounding the Settlements and Billing operations that ERCOT performs for Market Participants, for a period of time from October 1 to September 30. Once the report has been accepted by the Board, ERCOT issues a Market Notice that the report is available

Scope of SOC audit at ERCOT

ERCOT has identified 22 Objectives and 113 controls related to market Settlements and Billing. The controls correspond to ERCOT's market functions and are deemed relevant to internal control over financial reporting (ICFR) for Market Participants, as well as risks to ERCOT

The 22 objectives cover two specific topic areas:

- Transaction processing controls
 - Registration/Qualification
 - Network Operations Model
 - ERCOT Market Operations (DAM, RTM and CRR)
 - Data Acquisition, Aggregation and Validation
 - Settlement, Billing, and Financial Transfer
- General IT controls
 - Access controls (Logical & Physical)
 - Program change management and system development
 - Scheduled processing, backup, and recovery

ERCOT employs a third-party audit firm to conduct an examination of the Settlements and Billing processes

Request for Vote

ERCOT staff recommends that the F&A Committee recommend that the Board accept the 2023 SOC audit report as provided in the Committee's Executive Session materials

<VOTE> to accept audit report following presentation by Weaver
