Thanks for the opportunity to submit feedback to be taken into account to shape/adjust the draft.

We humbly request that Large Loads currently waiting on ERCOT for final/stability approval as a final step to fulfill the 9.4 + 9.5 PG criteria as firm load, be allowed to do during this month of February, and **perhaps a grace period.**

We don't believe the backdated 1/28/2026 snapshot makes sense given the ruleset has not yet changed, and both the TSP's and ERCOT are currently working under the current PGRR framework, and prior to a Good Cause exception being used. This would be a poor use of ratepayer \$ and private businesses time/\$.

Thanks so much!
